QA Engineer

About Swarm Analytics:

Swarm Analytics is an Applied AI company headquartered in Innsbruck, Austria. Since our foundation in 2018, we have been growing rapidly and are looking for ambitious people who would love to contribute to one of the technology world's most interesting fields. At Swarm Analytics, we solve real-world problems of our business customers and partners with our enthusiasm for technology.
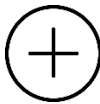

Role Description:

Do you want to be responsible for the quality of our products? We are looking for an experienced **QA Engineer** who plans, coordinates and executes testing activities for our existing and new products. You will work closely with our software engineers and product manager.

Minimum Requirements:

- Experience in software quality assurance
- Experience in analyzing business requirements and writing clear, concise and well-structured test plans

Preferred Requirements:

- Experience with Xray
- Experience in software development and UNIX environments
- Experience with test automation

Conditions:

- Permanent contract
- Flexible working time
- An office in the heart of the Alps (okay, that's not our merit, but still great!)
- An annual minimum wage starting from 45.000€ gross for full-time (38.5 h/week)

Got curious? Then send us your resume and join the Swarm!
