Java Developer (f|m|d)

Vienna, Graz, Innsbruck, Obertshausen, Warsaw, Zagreb, Barcelona, Taipei, Seoul, Hanoi, Portland & many more!

You have completed your training and are now looking forward to start your career as a Java Developer? Or maybe you have already gained some professional experience as a developer and are ready for a new challenge in which you can contribute and deepen your skills? Furthermore, you are an absolute team player, you love an agile working environment, and you are looking for a company where fun is never missed out on?

Great, then CompaxDigital is the perfect match for you!

We are an international software company with an in-house developed and completely cloud-capable order-to-cash software solution, and we are active in the areas of Telco, IoT, Media and Tolling. We offer our customers tailor-made software solutions so that they can get the best out of their business.

YOUR ROLE WITHIN THE TEAM

> As we are currently growing, we are constantly looking for passionate developers. Depending on your knowledge and preferences, you can deepen your knowledge in backend or frontend development.

> Active involvement in the entire software lifecycle, from requirements analysis to deployment in the Scrum team

> According to your strengths you can focus on Frontend, Backend, or Fullstack Development

> Conception, development and optimization of software features in the Java environment

> Development of interfaces from software to different database systems

> If desired and if you have the necessary know-how, you can take on DevOps tasks on a pro rata basis

> Regular customer exchange in the context of the Daily Scrum Meetings

> Snippet of our technology stack: Java, Spring, Hibernate, Spring Boot, React.js, Angular, Oracle, Postgres, Kubernetes, Git, GitLab-CI, etc.

YOUR SKILLS

> Completed IT education (HTL/FH/Uni) and/or first experience as a software developer

> Solid knowledge in an object-oriented programming language and with relational databases

> Agile mindset and knowledge about agile development methods like Scrum

> Absolute team player with a solution-oriented and innovative way of working

> Fluent written and spoken English skills
